

ST. THOMAS' COLLEGE OF ENGINEERING & TECHNOLOGY

Departments & Academic Divisions

Department profiles • academic domains • laboratories • faculty • projects

Purpose: detailed institutional context for a college-information / RAG hackathon project.

1. Department Map

- The starter context identifies department-level information as a core knowledge category. The current official site organizes undergraduate engineering education around CSE, AIML, IT, ECE and EE, with Basic Science & Humanities supporting foundational education.
- Each department can be treated as an entity containing programmes, faculty, technical staff, laboratories, training and placement information, newsletters and innovation activities.

2. Computer Science & Engineering

- The official CSE department describes a strong computing and technology foundation. Its course description includes programming, data structures, algorithms, AI, cloud computing and cybersecurity.
- The department states that it maintains industry relationships and regularly organizes campus-connect courses; it specifically names LTI Mindtree and Cognizant Technology Solutions.
- The department also states that students undertake research-oriented and industry-oriented projects and that it has a research laboratory and specialized project laboratory.

3. Artificial Intelligence & Machine Learning

- The AIML programme is positioned around modern AI and ML areas including machine learning, deep learning, NLP, computer vision and cloud computing.
- For a RAG system, AIML should be indexed separately from CSE because students may ask programme-specific questions about curriculum, careers, faculty, projects and placement preparation.

4. Information Technology

- The IT programme emphasizes information systems, software and technology-driven solutions. Its published curriculum themes include programming, databases, networking, web technologies, software engineering, data analytics and cybersecurity.
- The department page exposes faculty, technical staff, laboratories, gallery, training and placement, newsletters and innovation resources.

5. Electronics & Communication Engineering

- ECE provides an engineering domain combining electronics and communication-oriented study, practical laboratory work, faculty and technical-staff resources.

- The department publishes its own course, vision/mission, PEO/PSO, laboratories, faculty, technical staff, training/placement, innovation and newsletter sections.

6. Electrical Engineering

- EE provides electrical engineering education supported by dedicated course, faculty, technical staff, laboratory, training and placement resources.
- Questions about EE should be routed to the EE department context rather than answered from generic engineering information.

7. Basic Science & Humanities

- The attached context treats foundation education as part of the engineering academic ecosystem. The official faculty directory includes BSHU as a filter.
- BSHU can be represented in the knowledge base as a foundation/academic-support department with its own faculty and academic responsibilities.

8. Department-level RAG schema

- department_name, programmes, course_topics, faculty, technical_staff, laboratories, placement_info, newsletter, innovation_activity, vision_mission
- Useful questions: Which department offers a programme? What labs are associated with a department? Who are the faculty members? What industry activities does the department conduct?

Source & data-quality note

This document combines the attached STCET starter-context PDF with current official STCET web information where explicitly indicated. The attached source describes itself as a structured starter context for RAG experimentation and says that current admissions, fees, placement statistics, examination dates, contacts and other time-sensitive data must be populated from current official sources before deployment. ■filecite■turn0file0■L55-L69■

Official web sources used for current verification include the STCET Faculty Members directory, Courses/Programme pages, Institute Cells directory and Training & Placement Cell. These sources should remain the preferred authority for live answers.
