

ST. THOMAS' COLLEGE OF ENGINEERING & TECHNOLOGY

Student Life & Activities

Clubs • skills • mentoring • sports • hackathons • internships • community

Purpose: detailed institutional context for a college-information / RAG hackathon project.

1. Beyond the Classroom

- The starter context states that student life extends beyond formal coursework. Examples include technical clubs, coding activities, cultural programmes, sports, seminars, workshops, hackathons, project exhibitions and student-led events.
- These activities support communication, teamwork, leadership and practical engineering skills.

2. Official Student-facing Cells

- The institutional directory lists Co-Curricular Activity Cell; Extracurricular Activity Cell with Social Service Club + Cultural Club; Sports & Games Cell; Mentoring Cell; Entrepreneurship Development + Skill Development; and Grievance Redressal Committee.
- These cells can be represented as separate service entities in a student-facing assistant.

3. Technical Skill Development

- Students can develop programming, software development, AI/ML, data science, cloud, cybersecurity, electronics and IoT skills through coursework and practical projects.
- The Training & Placement Cell also organizes skill-upgrading opportunities, industry exposure, external training and career guidance.

4. Career & Industry Exposure

- The official Training & Placement Cell describes industry meets, industry visits, talks by leading professionals, external expert training, placement drives, aptitude/personality development programmes, career guidance and additional preparation for GATE/competitive examinations.
- This makes student life directly connected to employability and professional preparation.

5. Internship Evidence

- The attached context treats internships as a professional-development category. Current official placement material should be used for exact internship counts, organizations and years because such information changes by cycle.
- Where an internship record is stored, recommended metadata includes student year, department, organization, role/type, academic year and source document.

6. RAG Questions

- What activities can students participate in besides academics?

- What clubs/cells support student life?
- How can students prepare for placements?
- What kinds of technical activities and hackathons are relevant?
- What mentoring and career-support mechanisms exist?

Source & data-quality note

This document combines the attached STCET starter-context PDF with current official STCET web information where explicitly indicated. The attached source describes itself as a structured starter context for RAG experimentation and says that current admissions, fees, placement statistics, examination dates, contacts and other time-sensitive data must be populated from current official sources before deployment. ■filecite■turn0file0■L55-L69■

Official web sources used for current verification include the STCET Faculty Members directory, Courses/Programme pages, Institute Cells directory and Training & Placement Cell. These sources should remain the preferred authority for live answers.
