

ST. THOMAS' COLLEGE OF ENGINEERING & TECHNOLOGY

Alumni, Achievements & Institutional Memory

Alumni • achievements • mentoring • networking • evidence

Purpose: detailed institutional context for a college-information / RAG hackathon project.

1. Alumni as a Knowledge Domain

- The official institutional-cell directory lists an Alumni Coordination Cell. Alumni Connect is therefore a distinct institutional information category rather than merely a list of names.
- An alumni knowledge base can store graduation year, department, current organization, professional profile and notable achievement when the college publishes those details.

2. Why Alumni Matter for Students

- Alumni can contribute mentorship, career guidance, industry knowledge, internship connections and professional networking.
- For a hackathon assistant, alumni information can be connected to departments, graduation years, organizations and areas of expertise.

3. Achievement Categories

- Useful achievement categories include placement offers, internships, academic performance, higher studies, publications, research, innovation competitions, project awards, technical certifications and professional recognition.
- Each achievement should retain a source and date so that an assistant can distinguish historical achievements from current information.

4. Institutional Memory

- Department newsletters, annual reports, placement pages, event reports and alumni pages can collectively form a time-indexed institutional memory.
- This supports questions such as: What happened in a particular academic year? Which department reported an achievement? Which students participated in a competition?

5. RAG Questions

- How can students connect with alumni?
- What information is available about alumni?
- What kinds of student achievements are documented?
- Which official document records a particular achievement?
- How can alumni data be used for mentorship or career guidance?

Source & data-quality note

This document combines the attached STCET starter-context PDF with current official STCET web information where explicitly indicated. The attached source describes itself as a structured starter context for RAG experimentation and says that current admissions, fees, placement statistics, examination dates, contacts and other time-sensitive data must be populated from current official sources before deployment. ■filecite■turn0file0■L55-L69■

Official web sources used for current verification include the STCET Faculty Members directory, Courses/Programme pages, Institute Cells directory and Training & Placement Cell. These sources should remain the preferred authority for live answers.
